

Results of BIC investigation for Connection Application

Connection Application Information

CLINICAL INVESTIGATOR			
Name	Faculty Appointment & Institutional Affiliation	Email	Telephone
Disease name and description			
Gene name: <i>GENE NAME</i>			
Genetic evidence that the gene or variant is disease-causing			
REQUEST TO CONSORTIUM			
Requested model organism			
Partner has already been identified			

BIC Investigation Results

HUMAN GENE NAME	
Known orthologs	
Mouse	<i>Mouse ortholog</i>
Rat	<i>Rat ortholog</i>
Zebrafish	<i>Zebrafish ortholog</i>
Fly	<i>Fly ortholog</i>
Worm	<i>Worm ortholog</i>
Yeast	<i>Yeast ortholog</i>
Registry hits	
<p>Mouse - A list of researchers that have added the mouse ortholog to their profile, which includes the researcher's basic info, their research interests and the numbers of the genes they registered in each category.</p>	
<p>Fly - ...</p>	
<p>Yeast - ...</p>	
<p>If a MO researcher partner was specified in the Connection Application, the BIC report would include a summary of their Registry profile, if it exists. If they have not registered, they would be asked to do so at the time of SAC invite.</p>
